

Breaking the language barrier in the room

InfiniSpeak is a live multilingual communication platform that lets people listen, speak and participate in the language they understand best, using the phones they already have.

One message. Every language.

CATEGORY Live multilingual communication / AI-powered translation	WEBSITE everytongue.net	LANGUAGES 101 supported languages
SPOKEN AUDIO 98 languages	ACCESS Browser-based	AUDIENCE INSTALLATION No app required
EVENT ATTENDEE REGISTRATION No account, name, email or password required	MEDIA CONTACT hello@everytongue.net	

THREE MODES

Event Mode. Attendees scan a code, choose a language and follow the speaker through translated captions and, in 98 languages, spoken audio on their own phones.

Talk. Participants speak in any of 71 languages from their own phones; everyone else receives what they say in theirs. A hand-raising queue lets organisers manage the floor.

Personal Mode. Listen for me: a phone listens to someone speaking another language and the user follows in their own, with no organiser involved. Needs an account; includes 15 free minutes.

LANGUAGES

101 languages, including Yorùbá, Hausa, Igbo, Nigerian Pidgin, Krio, Swahili, Amharic, French, Portuguese, Spanish, Korean and Mandarin Chinese. Captions and audio are delivered separately, so captions continue when audio is unavailable.

FOR CHURCHES

Recognises Bible references as they are spoken, in 19 languages, and shows the passage from a published, licensed Bible in 58 listening languages. Never machine-translated.

DESIGNED FOR

Conferences · Churches · Leadership gatherings · Training programmes · Nonprofits · Educational environments · International meetings · Tours · Multilingual community gatherings

Try it: everytongue.net/live/DEMO, on any phone, any language, no sign-in.
